Can somebody track me with a Find my iPhone application?

2019/08/27

Hello Emily! You should know that there are lots of dangerous mobile applications, but that Find My iPhone is a really cool app that makes it possible for you to track down your lost or stolen iDevice, it can be an iPhone, iPad, iPod touch and Mac. The app will also show you not only the location of your mobile gadgets, but driving directions as well. You can also set the device to the "Lost Mode" and in that case you will be able to set the image that will be displayed on the lock screen and your mobile phone will be blocked with a 4-digit password. Also the device will play a sound for two minutes, even if the device is turned into silent mode. But that application has a couple of weaknesses, first of all if the device will be turned off, the app won't find it's location, so it is pretty simple to avoid that tracking, by simply turning the device off. So, that application can not guarantee 100% safety for your iDevice, but we at jammer-store.com still recommend you to install it, it may help if you will lose your mobile device. Now let's talk about tracking the user with that app. You should know that theoretically any device that has an embedded GPS receiver can be tracked. And that mobile application uses GPS navigation and cell phone tower triangulation. It is rather accurate and your location will be visible to anyone who has an access to your iCloud account. If you want to avoid tracking - you may use an A-GPS jamming device to make sure that nobody is watching you. If your mobile phone will be lost or stolen, it will not be jammed and its location will be visible again! Thank you for your question, I hope I've managed to help.
