Wireless network problem

2019/08/27

I have this problem for quite a while now and the ISP cannot seem to resolve the problem. Wireless network will suddenly disappear and will reappear and we but cannot connect to it. At the same time, the wired connected computer is working fine. At all happens to all devices connected wirelessly while all wired connected system dont experience any problem at all. To fix the issue we need to restart the router over and over. Already tried to reset the Router but no help. Any idea what's causing the problem?
